

FORMS OF ENERGY

WITH THE NAME OF ALLAH, MOST GRACIOUS, MOST MERCIFUL.

There are different forms of energy --- solar energy, heat energy, kinetic energy, potential energy, etc.

One of Allah (S.W.T.)'s laws of energy is that it is never lost but transferred.

A good example of this can be found in the story of Dhul-Qarnain. He used iron and lead to build a wall to keep the evil Gog and Magog people from attacking a weak community.

In Sura al- Kahf (ch. 18): verses 96 & 97:-

“Bring me blocks of iron.’ at length, when he had filled up the space between the two steep mountain-sides, he said, ‘blow (with your bellows)’. Then, when he had made it (red) as fire, he said: ‘bring me that I may pour over it, molten lead’. Thus were they made powerless to scale it or to dig through it”

In the above event potential energy was transferred into heat energy!

Worksheet

1) What is one of Allah (S.W.T.)'s laws of energy?

2) Offer two forms of energy.
