

# RIVERS AND SEAS

**WITH THE NAME OF ALLAH, MOST GRACIOUS, MOST MERCIFUL.**

The Amazon River is an example of a massive river created by Allah (S.W.T.).

It is one of the largest and famous rivers of the world.

It raises in the Andes Mountains and flows across the northern part of South America to the Atlantic Ocean.

The area through which the Amazon River flows is known as the Amazon basin.

The waters of the rivers flow in channels into the seas.

Our Rabb has made rivers and seas for the use of humanity.

We read in Sura Ibrahim (ch. 14): verse 32:-

“... It is He who has made the ships subject to you, that you may sail through the sea by His command; and the rivers (also) has He made subject to you.”

Our Rabb has also made various animals and mammals that live in rivers and seas for our benefit.

“... Yet from each (kind of water) do you eat flesh fresh and tender, and you extract ornaments to wear; ...”

Sura Fatir (ch. 35): verse 12

Besides food, we also get coral, pearls, amber and shells from the seas.

## **Worksheet**

1) Where is the Andes Mountains?

---

2) Give three benefits for humans from the rivers and the seas.
