

FOOD FOR THOUGHT TO THOSE WHO SAY THERE WAS NO PRE-EXISTING DESIGN IN NATURE FOR US BUT OUR OWN ADAPTATION?

WITH THE NAME OF ALLAH MOST GRACIOUS, MOST MERCIFUL.

You are aware that light and the colour green strengthen sight, and green is the prevailing colour in nature after light.

Many believe that the colour green was not intentionally made to strengthen sight, and that it became accustomed to be benefited from light and the colour green.

These folk overlook an experience which is met with rather frequently; i.e., a mole possesses eyes, but owing to its being mostly out of the way of light, it is blind.

The mole could not make its environment subservient to its sight.

This shows to what an extent the eye is indebted to light and the colour green as they not only keep the sight, but also keep it well.

Worksheet

1) Offer comments on Sura Ta-Ha (ch. 20): verse 50

2) Do you believe that a super intelligence (Allah (S.W.T.) created the universe and gave each thing its own special design?
